

## Introduction and explanatory notes

*Statistical Indicators for Asia and the Pacific* is a publication designed to provide up-to-date monthly data for the purpose of assessing the short-term demographic and economic trends in countries or areas of the region. It has been offered in print on a quarterly basis from 1971 to 2003. From January 2004 onwards, the quarterly releases have only been electronic at <http://www.unescap.org/stat/data/statind/>.

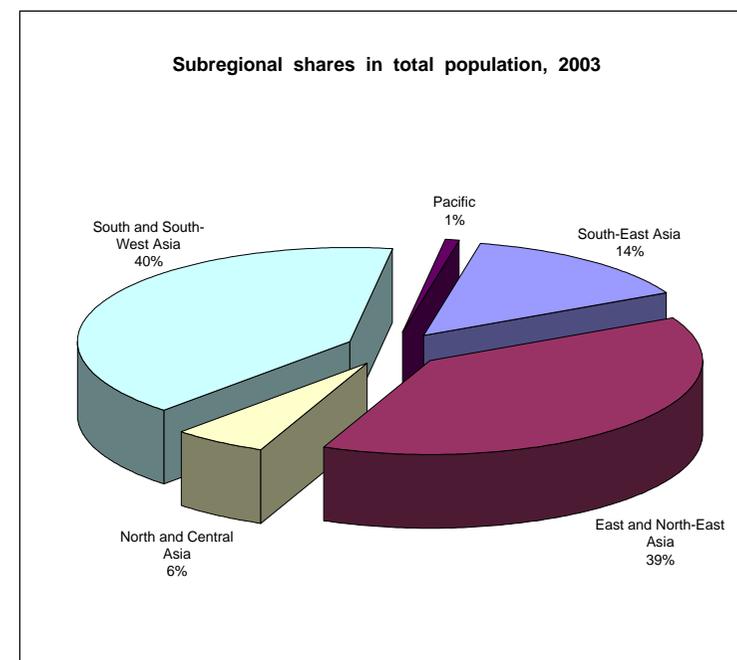

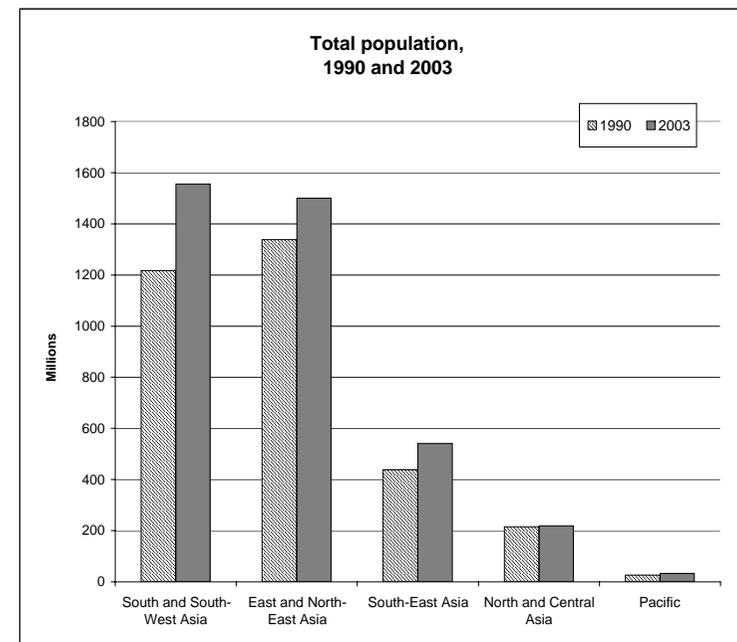

The main part of the publication represents the monthly data released online in December 2004 for selected countries and areas of the region. The publication starts, however, with 17 tables that cover comparative annual socio-economic indicators for all regional members and associate members of ESCAP.

\* \* \*

- Data appearing in this publication are compiled from special submissions by countries or areas, official national publications, the United Nations *Monthly Bulletin of Statistics*, the *International Financial Statistics* of the International Monetary Fund and information provided by other international organizations.
- Unless otherwise stated, the metric system of weights and measures is used.
- Data shown for the latest period should generally be treated as provisional.
- The designation "country or area" covers countries, territories, cities or areas.
- Figures shown between three broken lines (- - -) are the average for the period and figures between four broken lines (- - - -) are the total for the period covered.
- The following symbols are used:
  - . . . data not available
  - nil or negligible
  - || series changed
- On 1 July 1997, Hong Kong became Hong Kong, China. Mention of "Hong Kong" in the text refers to a date prior to 1 July 1997.
- On 20 December 1999, Macau became Macao, China. Mention of "Macau" in the text refers to a date prior to 20 December 1999.
